Education

Assam Engineering College, Guwahati **2023 – 2027**
Bachelor of Technology in Electronics and Telecommunication *CGPA: 7.83/10*

Technical Skills

Languages: Java, TypeScript, JavaScript, Python, C++, C, SQL
Frameworks & APIs: Node.js, Express.js, React.js, Next.js, Tailwind CSS, REST, GraphQL, Socket.IO
Databases & DevOps: PostgreSQL, MongoDB, Redis, RabbitMQ, Docker, GitHub Actions, Git, Cloudinary
Core CS: DSA, OOP, System Design (HLD/LLD), Microservices, Distributed Systems, OS, Networks

Experience

Software Engineer Intern **Aug 2026 – Present**
Vibrnd *Guwahati, Assam*

- Shipped **full-stack features** across multiple modules of a production **restaurant POS platform**, streamlining order-to-billing workflows and improving transaction traceability.
- Architected a **scalable event management platform** with multiple modules, multi-step workflows, and **role-based access control (RBAC)** across user roles; reduced latency and DB load by **caching hot endpoints** and frequently accessed data with **connection pooling**; designed a deeply nested schema for a **task management engine**.
- Built and deployed a **full-stack registration platform** for a cricket league, engineered to stay responsive under **high concurrent traffic** during peak registration windows.

Projects

Syntropy: AI-Powered Mock Test Platform - Live | Source Code **Aug 2025**
Next.js, Express.js, MongoDB, TypeScript, Redis, RabbitMQ, Docker, Gemini, Groq

- Designed a **microservices architecture** of 5+ Dockerized services that scale and fail independently.
- Offloaded email, document processing, and AI evaluation to **RabbitMQ async workers**, keeping APIs fast.
- Built an **LLM pipeline** for PDF extraction and response validation, plus **WebSocket**-driven live timed tests.
- Automated answer evaluation with **prompt-optimized LLM scoring** across Gemini and Groq models.

Vector: Context-Based Social Media Platform - Live | Source Code **Jan 2026**
Next.js, Node.js, Express.js, MongoDB, Socket.IO

- Implemented secure auth with **HTTP-only cookie JWTs** and **Google OAuth 2.0** over a **RESTful API**.
- Built **real-time messaging** with **Socket.IO**: live delivery, read receipts, and deletes synced across clients.
- Modeled a **social graph** with posts, likes, comments, follows, private accounts, and follow requests.
- Developed an **event-driven notification system** with read, delete, and bulk-clear operations.
- Built **profile onboarding** with avatar uploads and secure session management across user accounts.

Coding Profiles

- Codeforces: **Specialist** (Max Rating 1419), 150+ problems solved
- LeetCode: **500+ problems** solved across DSA topics

Positions of Responsibility

Project Admin **May 2026 – Jul 2026**
Nexus Spring of Code *Remote*

- Reviewed and merged **200+ pull requests** and mentored **50+ open-source contributors**.

President **Jul 2025 – Jun 2026**
Assam Engineering College *Guwahati*

- Organized **15+ technical events** and mentored students in **DSA, CP, and software engineering**.
